### **DETAILED ACTION**

Claims 1-68 are currently pending.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-30, drawn to method for monitoring protein synthesis.
- II. Claims 32-61, drawn to apparatus for method of Group I.
- III. Claim 62, drawn to method for analyzing compound library.
- IV. Claim 63, drawn to apparatus for method of Group III.
- V. Claim 64, drawn to method for determining cellular protein pathways.
- VI. Claims 65,66, drawn to method for ribosome labeling.
- VII. Claim 67, drawn to method for protein production monitoring.
- VIII. Claims 68, drawn to method for protein production monitoring.

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is the

Art Unit: 1631

technical feature that links Groups I-VIII. Group I is not the contribution over the prior art because it is suggested by references teaching method for monitoring protein synthesis, such as references of Sel-Ida and of Rothschild cited in International Search Report issued in the parent PCT case. Therefore, the lack of unity is present because the linking technical feature is not a *Aspecial technical feature*≡ as defined by PCT Rule 13.2.
